<input type="checkbox"/>	30000311	Loctite spray cleaner 7063	150ml spray bottle	DM 9,14

**2. Parking brake**

Due to request of several customers we have developed and certified a parking brake for the DG-800. This option can be installed in a simple way. It works like this: Pull the airbrake handle back to actuate the wheelbrake and push the handle to the cockpit wall. A detent will engage in 1 of 4 notches to hold the system in this position.

If you want to install this useful option on your glider, you may order it with this form. The installation should be done by a certified repair station. You should account for approx. 2 working hours.

<input type="checkbox"/>	60830810	Retrofit kit parking brake incl. the necessary TN873/14	DM	154,00
		Total amount without tax	DM	=====
