

## Option for "neo" winglets LS1-c & LS1-d

In the course of the last months we have been increasingly asked whether the new neo winglets will also be available for the LS1c and d.

Based on the very good results of the new winglets on the LS1-f as well as on other LS types, we can assume an improvement of the flight characteristics for the LS1-c and LS1-d as well.

In order to secure the financial expenditure for construction and tooling, we would like to offer the winglets initially in the form of an option for LS1-c and -d customers. As soon as 10 options are available, we will start development and construction.

The target price for the LS1-c and -d "neo" winglets kit is approximately € 3,000.00 net.

### Option terms

After receipt of the option fee you will be entered into an option list. According to this list, customers will then be supplied with the kits for the winglets. This option obliges the customer to purchase the winglet kit. The customer has the option to withdraw from the purchase if:

1. the target price of € 3,000.00 net for the kit is exceeded.
2. the serial production of the kit has not started within 18 months after receipt of the option.

I hereby subscribe to an option for a kit of neo winglets for the LS1-c & -d.
